CovertEye RF
Covert cameras network based on wireless encrypted RF communication

Covert Remote Wireless **Surveillance**

The **CoverEye RF** system is designed to provide efficient surveillance in remote locations without infrastructure.

The system is ideal for Military and Tactical Operations, Border Protection, Construction Sites Security, Wildlife Protection etc.

HOW IT WORKS?

1.DETECTION
CovertEye RF wireless cameras capture high-resolution images/videos upon intrusion detection by built-in PIR sensors.
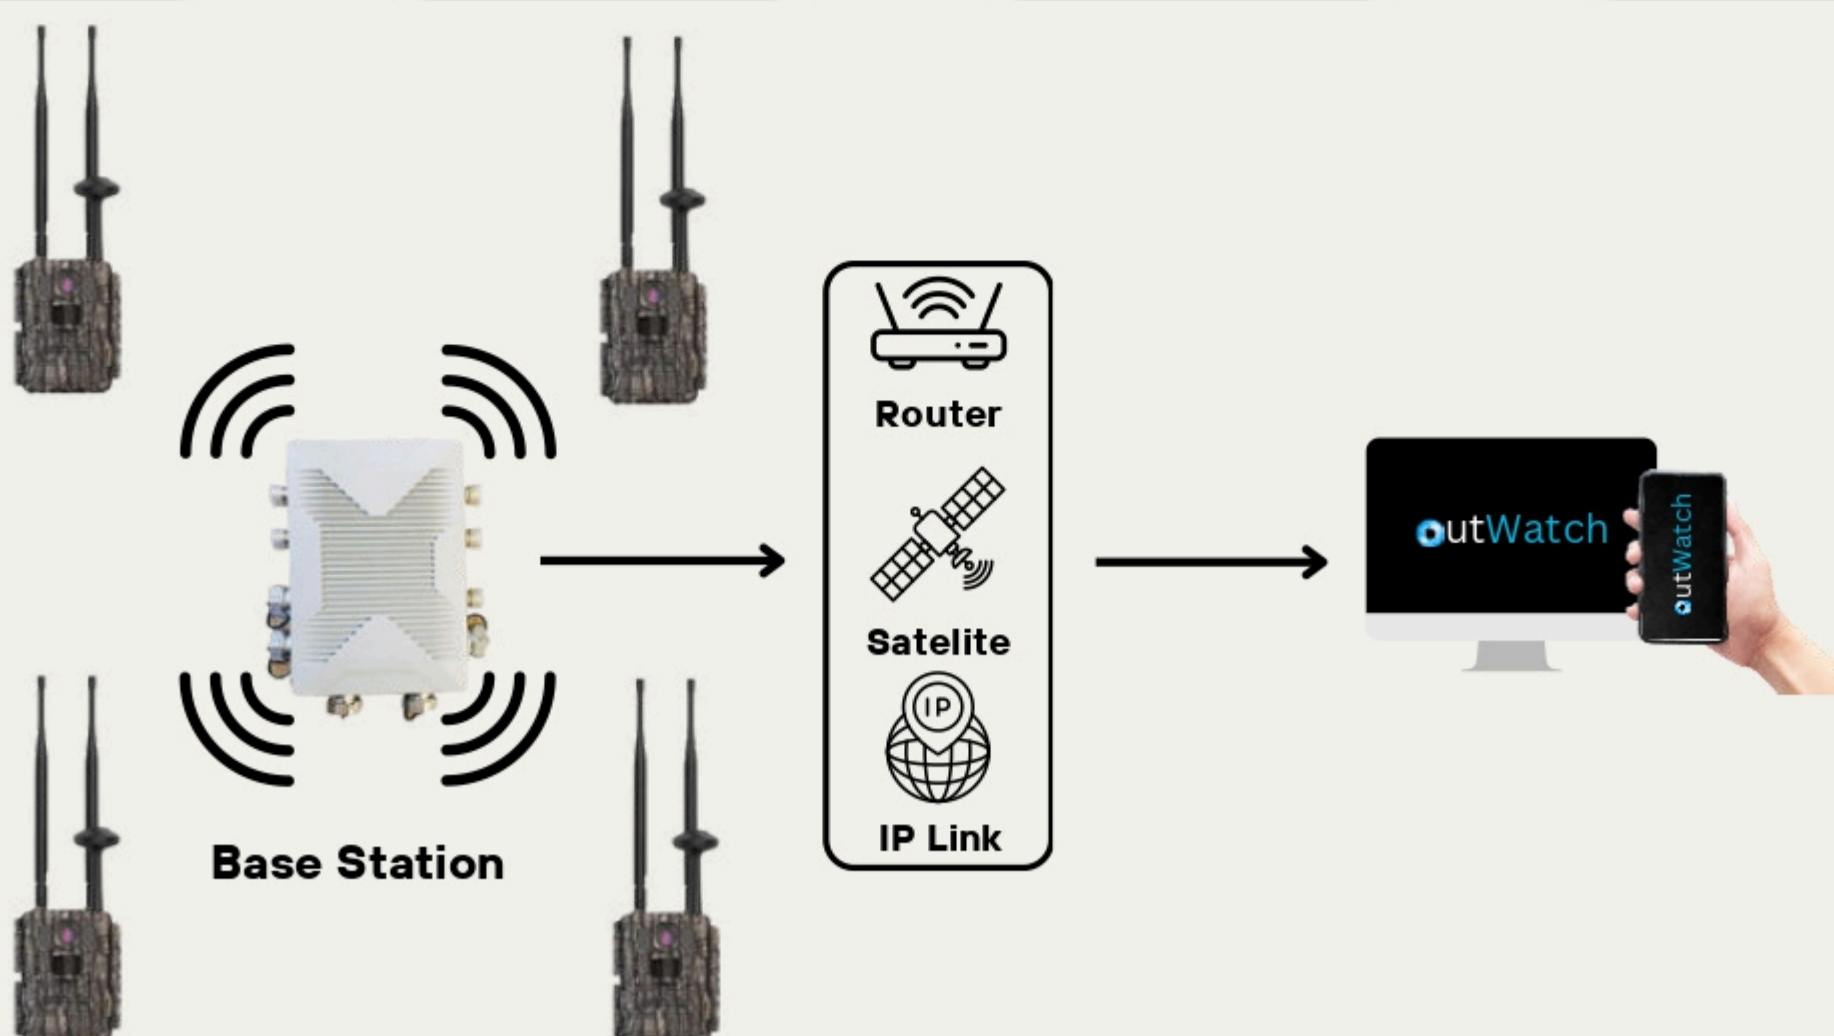

2.TRANSMISSION
The cameras transmit the images/videos to a central base station.

3.COMMUNICATION
The base station forward the information via TCP/IP communication to OutWatch Server.

4.VERIFICATION
OutWatch server provides alarm monitoring and real-time verification of alarms using our proprietary AI Vision analytics.

What's In The Kit?

RF CAMERA

The RF camera in the CovertEye RF network operates using long range 2.4Ghz RF technology to ensure robust communication and data transmission between the cameras and the base station.

IP67 | **32MP** | **3K** | **GPS** | **SD 512GB**

BASE STATION

The base station in the CovertEye RF network serves as a central hub for aggregating data from up to 16 cameras. It supports high-speed data transmission up to 5 km (1-3 km in wooded area).

IP67 | **Up to 16** | **Up to 5Km** | **30Mbps** | **256GB** | **GPS**

OTHER ACCESSORIES

RF Antenna

Power & Network Cable

Steel Brackets

- We can assemble a kit according to your needs
- Additional cameras or other accessories can be added
